

Waiter calling system

GS-50

Waiter calling system GS - 50 makes it possible for guests to call their waiter at any given time, by using a transmitter located on the table. Wireless controll is programmed to make two different calls:

- for service
- for check

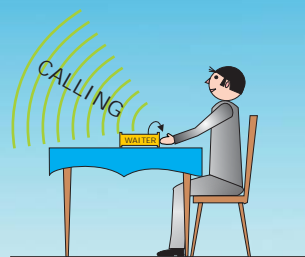

Provides for greater efficiency in your restaurant by allowing the waiter to service customers quickly upon demand. Even those he cannot see. Eliminates dissatisfied customers who become annoyed by having to catch the waiters attention. Happy customers are repeat business. The GS-50 is the perfect solution for Restaurants, Hotels, Pubs, etc and may help to increase your turnover.

SUITABLE FOR USE IN AREAS WITH:

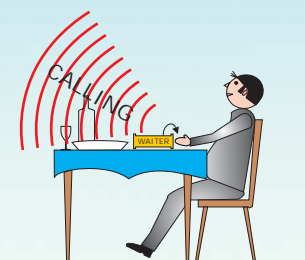

- higher number of tables
- more than one room
- summer garden
- private/exclusive functions

USING GS-50

Discreet call for service at any time

Discreet call to pick up the check

WITHOUT GS-50

Drawing attention to yourself while trying to call the waiter

Calling and waiting for the waiter to bring the check

The most important data and dimensions in cm

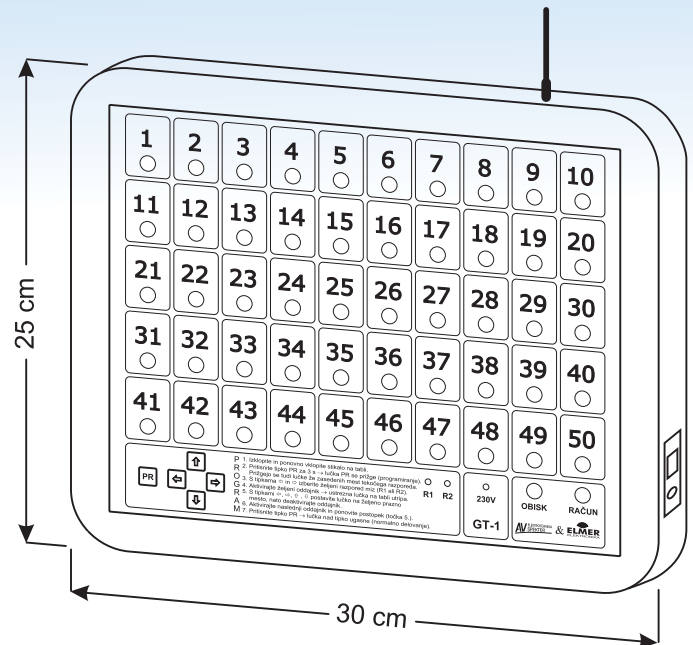

RECEIVER GT-50

Operating voltage:	12VAC / 0,8A max.
No. of transmitters:	up to 50 pcs
LED indication:	green LED - service red LED - check
Waiting period (>4 min):	LED is flashing
Dimensions (w x h x d):	30 x 25 x 3 cm
Weight:	approx. 2 kg

TRANSMITTER GOV-50 / GOS-50

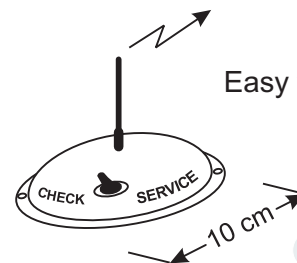

Operating voltage:	alkali 9V battery
Battery life time:	approx. 1 year
Low battery indication:	on GT-50
RF power:	9 mW
Frequency:	868,3 MHz ASK
Active range:	up to 100 m
Dimensions (w x h x d):	14 x 6 x 6 cm (GOV-50)
Dimensions (diameter x h):	10 x 3 cm (GOS-50)
Weight:	approx. 0,2 kg

Receiver **GT-50**

Easy to use - simply turn to appropriate position - no buttons, double information for the waiter (on the transmitter and on the receiver)

Transmitter **GOV-50**

Easy to fix to the table or on a nearby wall

Transmitter **GOS-50**
